Entry-level Software Engineer with practical experience in full stack web development, specializing in JavaScript and applying problem-solving skills to resolve complex coding challenges and deliver effective project solutions. Successfully developed and deployed user-centric web applications using React and CSS frameworks, enhancing user experience and functionality. Partnered with engineering, marketing, and design teams to coordinate project plans, resolve challenges, and deliver 90% successful projects on schedule and within scope. Trainee Software Engineer with hands-on full-stack web development experience who utilized advanced JavaScript frameworks and tools to design and implement complex solutions that addressed key project challenges during training. Developed applications using React and CSS frameworks, prioritizing intuitive interfaces and robust functionality to enhance user experience. Eager to apply my success in driving results through cross-functional collaboration and rapid adaptation to new challenges, consistently delivering impactful project outcomes.

Work Experience

FULL STACK WEB DEVELOPMENT TRAINEE

| Gurugaon

Apr 2025 - Present

- Developed, tested, and deployed software applications using Java, JavaScript, HTML, and CSS, resulting in [number]% improvement in functionality and performance.
